

### Amendments

#### Please amend the Drawings as follows:

Figure 16 is added, and is enclosed herein labeled “New Sheet” in the top margin. Figure 16 is equivalent to the figure labeled Graph 1 in the Specification, and no new matter has been added.

#### Please amend the Specification as follows:

##### On page 7 of the Specification:

Replace the first full paragraph beginning “AA is evaluated...”, with the replacement paragraph as follows:

AA is evaluated according to versions of the present invention by locating the nearest point **20** within a limited predetermined range **24** of distances **26** from the eye **12** for which a change in distance **26** within the range **24** causes a relatively constant change in the eye’s accommodation power. To focus on a target **22** at any distance **26**, the dioptric power of the overall lens (i.e. the accommodated power of the lens **16** of the eye **12** plus the power of any additional lens **28**) equals  $(100)/(\text{distance } 26 \text{ in centimeters between the target } 22 \text{ and the eye } 12)$ . ~~See Graph 1~~ Refer to Figure 16 for the relationship of overall lens power to distance **26** between the target **22** and the eye **12**. This, thus, is an inverse relationship, for which only limited ranges in the most common near-vision distance values (10 centimeters to 60 centimeters) have a relatively constant affect on accommodation.

##### On page 8 of the Specification:

Remove the title Graph 1 and remove the related figure.

**REMARKS**

In a Notice of Allowance, the Examiner allowed claims 1-8, 15-18, and 24-50. The Examiner requested in a further communication that the figure labeled "Graph 1" in the specification be moved to the figures as a Drawing, and that appropriate amendments be made to the Specification. Applicant requests the entry of Figure 16 included herein. Applicant has removed the figure labeled "Graph 1" from the Specification and presents the amendments to the Specification herein. No new matter has been added.

The present patent application is thereby ready to issue as a patent. The Examiner is cordially invited to contact the undersigned by telephone to discuss any unresolved matters.

Respectfully Submitted,

---
